# DOTAREM<sup>®</sup>

Gadoteric acid

## Stability is in its DNA

Upon the conception of Dotarem<sup>®</sup>, Guerbet's research team, in order to minimize the release risk of gadolinium, designed the gadoterate meglumine molecule to provide high chemical stability.<sup>1</sup>

Dotarem<sup>®</sup> shows a unique profile based on its original features:

- Macrocyclic & ionic molecule developed by Guerbet's researchers
- Patented manufacturing process
- More than 70 million global injections with zero confirmed unconfounded cases of NSF<sup>2-4</sup>
- No visible brain hyperintensities related to dechelated Gd, even in cases of repeated injections<sup>5-8</sup>
